Teacher Coaching Brief

- Source clip: `/workspace/TeacherEvaluation/evaluation/local_data/runs/gemini_flash_local/yale_finance_240_300/run_20260318T012454Z/full_segment_reference.mp4`
- Analyzed duration: `60.00s`
- Window count: `4`
- Report mode: `llm_api_hybrid`
- Report shape: `feedback_first_v1`

At a Glance

This report highlights strengths in open-palm explanatory gestures and distributed room engagement. Opportunities for growth include refining gesture size, opening posture between points, and reducing extended note-reading. The feedback aims to enhance presence and audience connection through concise, actionable steps.

Reliability: medium.

Top 3 Actions for the Next Lecture

1. Tighten the peak size of gestures

- Why it matters: Large bursts of motion can distract from the teaching point when they are not tightly timed.
- What we saw: 00:00-00:15 had gesture peaks that looked larger than the teaching point required. 00:15-00:30 had gesture peaks that looked larger than the teaching point required.
- What to try next: Keep big gestures for true emphasis and use smaller controlled hand movements elsewhere.
- Review at: 00:00-00:15, 00:15-00:30, 00:30-00:45, 00:45-01:00
- Confidence: medium

2. Open the stance between points

- Why it matters: A more open posture tends to read as more confident and easier to approach.
- What we saw: 00:00-00:15 showed a more guarded arm-and-shoulder position between teaching points. 00:30-00:45 showed a more guarded arm-and-shoulder position between teaching points.
- What to try next: Let the elbows open slightly and release any folded or guarded arm positions between points.
- Review at: 00:00-00:15, 00:30-00:45
- Confidence: medium

Strengths to Preserve

Open-palm explanatory delivery

- Evidence: 00:00-00:15 included open-palm explanatory gestures that supported the explanation. 00:45-01:00 included open-palm explanatory gestures that supported the explanation.
- What to repeat: Keep the same open-palm gesture shape when emphasizing key ideas.
- Review at: 00:00-00:15, 00:45-01:00
- Confidence: medium

Distributed room engagement

- Evidence: 00:15-00:30 showed attention moving across more than one part of the room. 00:45-01:00 showed attention moving across more than one part of the room.
- What to repeat: Reuse the left-center-right room sweep that already looks natural.
- Review at: 00:15-00:30, 00:45-01:00
- Confidence: medium

Additional Observation Inventory

Reduce extended note-reading (watch item)

- Evidence: 00:15-00:30 repeatedly pulled attention down to notes instead of back to the room.
- Suggested response: Check whether note glances stay brief and return to the room within the same teaching beat.
- Review at: 00:15-00:30
- Confidence: medium

Deliberately sweep the room (watch item)

- Evidence: 00:30-00:45 stayed more fixed on one part of the room than on a left-center-right sweep.
- Suggested response: Check whether the next explanation visibly reaches more than one side of the room.
- Review at: 00:30-00:45
- Confidence: medium

Increase room-checking behavior (watch item)

- Evidence: 00:45-01:00 showed fewer quick room checks and a less visibly alert scan.
- Suggested response: Check whether transitions now include a visible room check before the next explanation.
- Review at: 00:45-01:00
- Confidence: medium

Low-Confidence Watchlist

Reduce extended note-reading

- Why it stays on the watchlist: The signal is visible, but it is not yet sustained enough to justify real corrective feedback.
- What we saw: 00:15-00:30 repeatedly pulled attention down to notes instead of back to the room.
- What to monitor next: Check whether note glances stay brief and return to the room within the same teaching beat.
- Review at: 00:15-00:30
- Confidence: medium

Deliberately sweep the room

- Why it stays on the watchlist: The signal is visible, but it is not yet sustained enough to justify real corrective feedback.
- What we saw: 00:30-00:45 stayed more fixed on one part of the room than on a left-center-right sweep.
- What to monitor next: Check whether the next explanation visibly reaches more than one side of the room.
- Review at: 00:30-00:45
- Confidence: medium

Increase room-checking behavior

- Why it stays on the watchlist: The signal is visible, but it is not yet sustained enough to justify real corrective feedback.
- What we saw: 00:45-01:00 showed fewer quick room checks and a less visibly alert scan.
- What to monitor next: Check whether transitions now include a visible room check before the next explanation.
- Review at: 00:45-01:00
- Confidence: medium

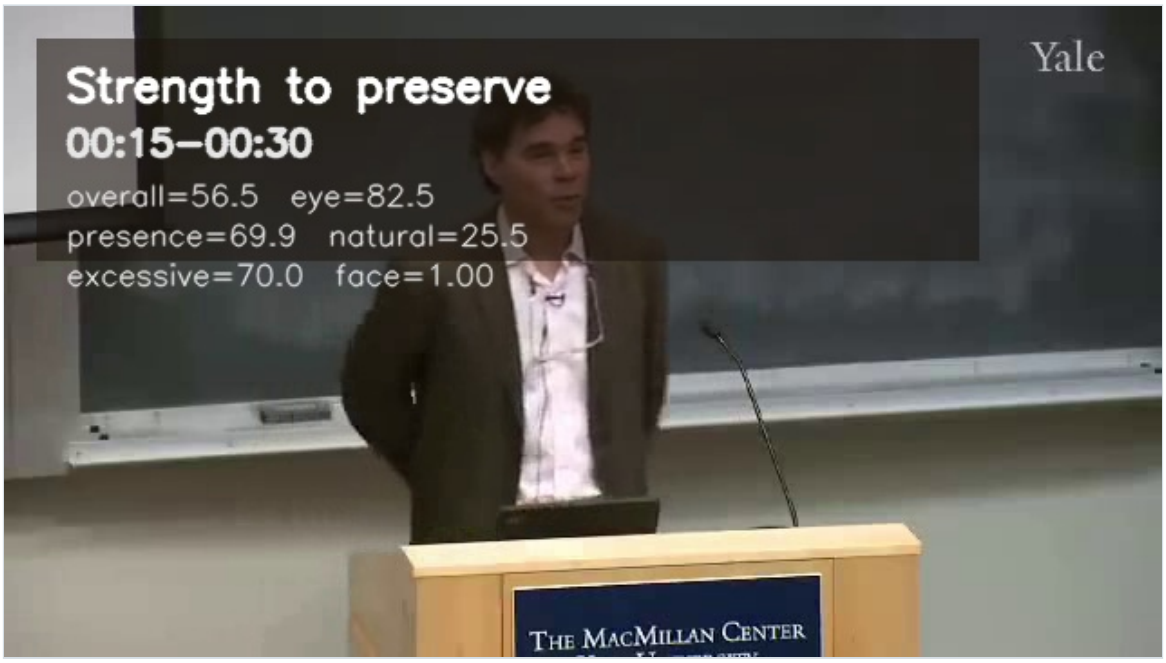
Moment-by-Moment Evidence

00:00-00:15 - Closed Posture

- Observed behavior: closed posture / over animated delivery / open palm explaining
- Metric evidence: Overall 44.0; room scan 55.0; presence 58.5; natural movement 26.2.
- Qwen interpretation: Qwen sees the teacher mainly addressing the audience; open-palm explanatory gestures recur.
- Coaching implication: Let the elbows open slightly and release any folded or guarded arm positions between points.

QC confidence: `medium`

00:15-00:30 - Distributed Room Engagement



- Observed behavior: distributed room engagement / note reading
- Metric evidence: Overall 56.5; room scan 82.5; presence 69.9; natural movement 25.5.
- Qwen interpretation: Qwen sees repeated note-reading or notes-focused attention; stance is often static.
- Coaching implication: Reuse the left-center-right room sweep that already looks natural.

QC confidence: `medium`

00:45-01:00 - Over Animated Delivery

- Observed behavior: over animated delivery / reduced alertness / open palm explaining
- Metric evidence: Overall 50.0; room scan 74.6; presence 68.4; natural movement 27.2.
- Qwen interpretation: Qwen sees the teacher mainly addressing the audience; open-palm explanatory gestures recur.
- Coaching implication: Keep big gestures for true emphasis and use smaller controlled hand movements elsewhere.

QC confidence: `medium`

00:30-00:45 - Uneven Room Scan

- Observed behavior: uneven room scan / closed posture / over animated delivery
- Metric evidence: Overall 47.3; room scan 53.1; presence 53.2; natural movement 28.3.
- Qwen interpretation: Qwen sees the teacher mainly addressing the audience; stance is often static.
- Coaching implication: At each major point, pause and sweep left-center-right before moving on.

QC confidence: `medium`

Reliability Notes

- Hand visibility drops in parts of the clip, so gesture labels are less certain.
- Hand coverage dropped below 85%; gesture classification is less stable.

Keep Doing

- Keep using open-palm gestures to emphasize key ideas.
- Continue to distribute your attention across the room with natural sweeps.

Watch For

- ["Gesture size that matches the importance of the

Technical Appendix

Metric	Value	Band
Overall score	49.4	limited
Natural movement	22.4	limited
Eye-contact distribution	71.0	moderate
Confidence/presence	62.5	moderate
